CLOUD OPTIMIZATION PROOF OF CONCEPT

Duration

3 Weeks

Supported Areas

Compute

Databases

Kubernetes

Networking

Security & Identity

Storage

Additional Offerings

Cloud architecture review

Application modernization services

Cloud Optimization as a service

Monitoring as a service

EchoStor Cloud Optimization POC Service

EchoStor's Cloud Optimization Proof of Concept will evaluate a customer's AWS environment to help reduce their monthly AWS bill. Let EchoStor help you save from a proof of concept and beyond!

Engagement Scope

This proof of concept locates common areas of overspending by the use of algorithm and expertise from your EchoStor Cloud Team. During the PoC EchoStor team members will review your AWS environment, create a comprehensive report, and discuss the team's findings and recommendations.

All EchoStor asks of the customer is to provide read-only access to the AWS account. From there, let the EchoStor team do the work!

Approach

Planning + Deployment

Initial kickoff & deployment of discovery tooling.

Week 1 + 2 Discovery

Data collection.

Week 3 Analysis

Analyze data to uncover hidden cloud costs, waste & areas for improvement.

Week 3 Review

Final review of the findings and savings report.
