# CLOUD JOURNEY

## 01

### Begin Journey
The first step in the journey: bringing email to Exchange Online.
Synchronize accounts to Azure AD in order to help cloud adoption begin.

## 02

### Communication & Collaboration
Create a modern workplace experience to enable users to better
communicate, collaborate, find information and create communities.
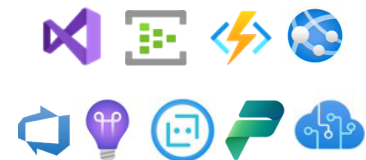

## 03

### Modern Endpoint
Protecting your endpoints and your data requires a cohesive solution.
Identify the best method to implement BYOD and VDI.

## 04

### Application Modernization
Leverage modern application development solutions to help improve
business processes and modernize legacy applications.

## 05

### Business Intelligence (BI) | Artificial Intelligence (AI) | Machine Learning (ML)
Leverage BI/AI/ML to help provide insight into the data for the organization.
Understand the data and how best to democratize the information.
