

ECHOSTOR NETWORKING & SECURITY

EchoStor assists customers in designing and deploying enterprise-class network and security solutions to ensure performance, reliability, and resiliency.

Solutions

- Enterprise Networking
- Wireless Design and Assessments
- Network Management
- Managed Detection and Response
- Endpoint and Edge Security Solutions

Cisco Specializations

- Advanced Enterprise Networking
- Advanced Security
- Advanced Data Center
- Hyperflex Specialization

Services

- Staging and Deployment
- Advanced Services (SDN, SD-WAN, etc.)
- EchoStor Delivery Resources
- Managed Security Services (DNS, MFA, etc.)

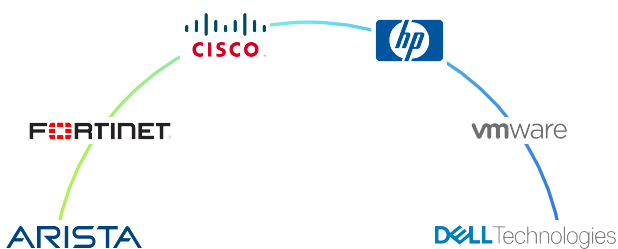

The Team

- Expert and Professional Level Engineers
- Multiple Industry Certifications and Specializations
- EchoStor delivery resources
- Dedicated Project Management

Architecture & Design for Network & Security Solutions

N&S Practice Solution & Technology Focus

- Enterprise Networking (LAN, WAN, WLAN, etc.)
- DC Networking (ACI, NX OS, NSX, EVPN/VXLAN)
- Next Generation Networking (SDN, SD-WAN, Cloud, SDDC)
- Network Management and Operations
- Technical Guidance, Architecture, and Design
- Staging and Deployment (Cat9k, N9k, UCS, etc.)

Security Solution Focus Layered Approach

- Next Gen Access | SASE
- Endpoints Protection (EDR, NDR, XDR)
- Security (DC/Network Security, NGFW, cloud, SASE)
- Security Operations (Managed SOC, SIR, Compliance)
- Pen Testing, Risk Assessments, vCISO
- Technical Guidance, Architecture, and Design
- Security Assessments
