

MODERN WORKPLACE

Business Process Automation

Enhance organizational efficiency by automating routine tasks and processes using Microsoft Power Platform.

Key Components

MICROSOFT POWER APPS

Workflow and Automation

Automate processes such as approvals, inspections, and service requests to reduce manual effort and improve consistency.

Application Development

Enable rapid development of line-of-business (LOB) apps with a low-code/no-code approach, allowing non-developers to contribute.

Data Visualizations

Integrate Power BI for real-time data visualization and reporting, providing actionable insights.

Chatbots

Deploy Power Virtual Agents to create interactive chatbots for customer service and internal support without requiring coding skills.

POWER AUTOMATE

Cloud Flows

Automate complex workflows that span multiple systems and services, ensuring seamless operations.

Desktop Flows

Utilize robotic process automation (RPA) to automate repetitive desktop tasks, increasing efficiency.

Process Mining

Analyze and optimize business processes, identifying areas for improvement and automation.

POWER VIRTUAL AGENTS

No-Code Bot Creation

Build chatbots using a guided graphical interface, suitable for users with no coding experience.

Integration with Teams

Embed chatbots within Microsoft Teams for easy access and enhanced user engagement.

Extensibility

Extend chatbot capabilities using the open-source Bot Framework Composer for advanced customization.

APPLICATION MODERNIZATION

Legacy Application Identification

Assess and document existing legacy applications, identifying opportunities for modernization.

Azure DevOps

Leverage Azure DevOps for continuous integration and delivery, facilitating application updates and maintenance.

Microservices & Kubernetes

Re-architect applications to utilize microservices and Kubernetes for improved scalability and manageability.

Benefits

Increased productivity

by enabling citizen developers to automate and improve processes

Streamlined business operations

with reduced manual workload and errors

Enhanced employee & customer experiences

through tailored apps and interactive chatbots
