MODERN WORKPLACE

End User Productivity

Boost productivity by leveraging Microsoft 365 tools and integrating end-user computing solutions.

Key Components

MICROSOFT TEAMS

Features
Instant messaging, calendar integration, OneDrive access, and team collaboration tools like channels, tabs, and apps.

Unified Access
Serve as a single pane of glass to access all apps and data, facilitating seamless workflow management.

SHAREPOINT PREMIUM

Content Experiences
Keep content fresh and discoverable, driving collaboration and productivity.

AI Integration
Utilize AI to classify, tag, and secure documents, streamline workflows, and introduce new experiences.

Document Processing
Provide document processing and content assembly services, along with eSignature capabilities.

Content Governance
Offer tools for managing content access, with features like Data Access Governance insights and sensitivity labeling.

EXCHANGE ONLINE (EXO) AND ONEDRIVE

Email and Calendars
Efficiently manage emails and calendars with Exchange Online.

Personal Data Storage
Use OneDrive for secure personal file storage, with functionality similar to a Document Library in SharePoint.

MIGRATION STRATEGY

Discovery
Understand the organizational structure and content sources.

Content Audit
Identify and categorize existing content across network shares and SharePoint.

Migration Plan
Develop and implement a comprehensive plan for content migration, including beta migrations and user training.

Benefits

Improved collaboration
and communication through integrated tools

Enhanced security & compliance
for content management

Streamlined mitigation processes
ensuring minimal disruption and smooth transition
