

MODERN WORKPLACE

End User Compute

Provide secure and efficient access to resources and applications for end users, leveraging Microsoft Entra and Intune.

Key Components

MICROSOFT ENTRA

Identity Management

Secure access to apps and resources with adaptive identity controls, ensuring protection and verification of every identity.

Access Controls

Implement least privilege access and manage permissions lifecycle, providing only necessary access to users.

User Experience

Simplify access with single sign-on, user self-service management, and automated lifecycle workflows.

MICROSOFT INTUNE

Endpoint Management

Manage and secure devices across various platforms, simplifying app deployment and policy configuration.

Security

Ensure device compliance and protect corporate data with advanced endpoint management capabilities.

Cost Efficiency

Consolidate endpoint management solutions, reducing complexity and costs.

VDI AND BYOD SOLUTIONS

VDI

Secure and controlled virtual desktops with Azure Virtual Desktop, providing centralized management & enhanced security.

BYOD

Allow users to bring their own devices, offering flexibility while maintaining control over applications and data.

SECURITY AND GOVERNANCE

Microsoft Purview

Discover and manage sensitive data with a unified data governance solution.

Azure Sentinel

Utilize cloud-native SIEM and SOAR solutions for intelligent security analytics and threat intelligence.

Microsoft Defender

Protect endpoints from cyberattacks with comprehensive security solutions covering identities, email, apps, and devices.

Benefits

Enhanced security & compliance

for accessing corporate resources

Simplified endpoint management

and reduced IT complexity

Flexible and efficient solutions

for both managed and personal devices, improving user productivity
